Page 696 Ethics and Issues: Read Is Beta Testing out of Hand?

What is Beta Testing? Would you participate in beta testing software on your pc? Why or why not? Are Software manufacturers being honest about their intentions in their beta testing? If not, in what way? Is it reasonable for software manufacturers to beta test their software for the general public? If so, for how long?

Letting you test something before it comes out to help it get better. Yes because I get to use it before it comes out. Yes because something could go wrong with it and then they could fix it maybe. Two to three months would probably be long enough.
